

Kostas Chatzikokolakis and Aaron Johnson

# Editors' Introduction

DOI 10.2478/popets-2020-0059

It is our great pleasure to introduce Issue 4 of Volume 2020 of the Proceedings on Privacy Enhancing Technologies (PoPETs). PoPETs is a journal that publishes articles accepted to the annual Privacy Enhancing Technologies Symposium (PETS). To contribute to the free availability of scientific publications, PoPETs is published under the open-access Creative Commons Attribution-NonCommercial-NoDerivs license.

PoPETS/PETS uses a hybrid conference-journal model, one that has since been adopted by many other conferences in the field. In this model, articles are published throughout the year at regular intervals, and the papers for the year are then presented at an annual conference. Reviewers can request revisions of submitted articles, which may then be revised and resubmitted in the same year. PoPETs publishes four issues per year. By enabling resubmission across these issues, PoPETS provides a high-quality peer-review process that enables authors and reviewers to work together to produce and recognize significant scholarly contributions.

The PoPETS double-blind peer-review process is similar to other top-tier computer security publications. The process includes initial review by the Chairs for scope and rules compliance, written reviews by multiple independent reviewers, author rebuttals to the reviews, discussion among reviewers, and consensus recommendation. The output of the review process is a set of reviews, a meta-review summarizing the reviewers' opinions after discussion, and one of the following decisions: Accept, Accept with Minor Revisions, Major Revisions, Reject and Resubmit, and Reject.

Articles submitted to this issue were reviewed by the 94 members of the Editorial Board and 31 external reviewers. The submitted articles, reviews, and discussion were available to all members of the Editorial Board that did not have a conflict of interest with the authors of the article. To identify conflicts of interest, the membership of the Editorial Board was published

before submissions were opened, and authors were asked to indicate members with whom any of the authors had a conflict. In addition, Editorial Board members were asked to list the authors and institutions with which they have conflicts of interest. Finally, the Chairs also checked for missed conflicts. Editorial Board members were welcome to submit articles, while the Chairs were precluded from doing so.

There were 89 submissions to this issue of PoPETs. 14 of the 89 submissions had been invited during a previous issue to resubmit after major revision, and these were reassigned to the Editorial Board members that had reviewed the previous version. Additionally, 11 articles that had been rejected from a previous issue were resubmitted to the journal, and they were reassigned to some of the same reviewers. For all these resubmissions, the authors provided a summary of changes made to the prior version that explained how review concerns had been addressed.

The PETS consistency experiment ended in 2019 and was not conducted for this issue. This experiment was performed throughout 2019 to evaluate the consistency of reviewing decisions<sup>1</sup>.

In this issue, we continued the two-round reviewing process that was started in Issue 4 of Volume 2019. In the first round, we assigned two reviewers to all papers, and at the end of the round we rejected some papers that had two reject scores (Reject or Reject and Resubmit). Non-rejected papers received additional reviews in the second round for a total of four reviews (in a few cases, submissions received fewer or more reviews). Many articles had an external review drawn from a pool of junior experts nominated by the community<sup>2</sup>. Further external experts were invited to review certain articles. The reviews were sent to authors, who were given the opportunity to submit a rebuttal. After the rebuttal period there was a discussion among the reviewers, other members of the Editorial Board, and the Chairs to reach a consensus decision for each paper. One of the reviewers was then selected to write a meta-review that summarized the discussion and the justification for the decision.

Of the 89 submissions, 9 papers were accepted, and 15 were conditionally accepted subject to minor revi-

<sup>2</sup> <https://bit.ly/2gxVDd8>

sions. For the latter, a reviewer was assigned as a shepherd to ensure that the important points from the meta-review were addressed. 24 articles were ultimately accepted and form the articles published in this issue. These articles will be presented at PETS 2020, July 13–17, 2020, held virtually this year due to SARS-CoV-2.

The authors of 39 other articles were invited to resubmit to a future issue of PoPETs. For 16 of them, specific major revisions were requested, to be reviewed by the same reviewers when submitted to one of the following two PoPETs submission deadlines. The remaining 23 articles received a decision of Reject and Resubmit (5 of them during the first round of review), as reviewers identified needed revisions that were unlikely to be successfully addressed in a short time. 16 papers received a decision of Reject (4 of them during the first round), either due to serious deficiencies or to being on topics out of scope for PoPETs. Finally, 1 paper was withdrawn by the authors before or during the reviewing period, and 9 submissions were rejected by the Chairs without Editorial Board review for being out of scope, over the page limit, or non-anonymous.

For the 2020 volume, we started an artifact-review procedure to collect, evaluate, and distribute any artifacts related to accepted papers (e.g. source code, datasets, machine-generated proofs, formal specifications, and build environments)<sup>3</sup>. Authors of accepted papers were encouraged (but not obliged) to submit their artifacts for review by an artifact-review committee. As a soft start, for 2020 the committee will be performing limited checks (e.g. documentation, licensing, and compilation); once approved, artifacts will accompany the corresponding papers on the PoPETs website.

We thank the following people for making the second issue of PoPETs Volume 2020 possible:

#### General Chairs for PETS 2020:

- Jeremy Clark, Concordia University
- Sébastien Gambs, Université du Québec à Montréal

#### Program Committee / Editorial Board:

- Abdelrahman Aly, imec-COSIC, KU Leuven
- Abigail Marsh, Macalester College
- Alan Mislove, Northeastern University
- Alptekin Küpçü, Koç University
- Amir Houmansadr, University of Massachusetts Amherst

- Ananth Raghunathan, Google Brain
- Anna Squicciarini, Penn State University
- Anupam Das, North Carolina State University
- Arkady Yerukhimovich, George Washington University
- Attila Yavuz, University of South Florida
- Aylin Caliskan, George Washington University
- Aziz Mohaisen, University of Central Florida
- Bart Preneel, KU Leuven
- Blase Ur, University of Chicago
- Bogdan Carbunar, Florida International University
- Boris Koepf, Microsoft Research
- Catuscia Palamidessi, INRIA
- Cecylia Bocovich, Tor Project
- Charalampos Papamanthou, University of Maryland
- Chaya Ganesh, Aarhus University
- Christo Wilson, Northeastern University
- Claudio Soriente, NEC
- Cristina Onete, Université de Limoges / XLIM
- Dali Kaafar, Macquarie University- CSIRO Data61
- Daniel Roche, U.S. Naval Academy
- Daniel Takabi, Georgia State University
- David Evans, University of Virginia
- Douglas Leith, Trinity College Dublin
- Erman Ayday, Case Western Reserve University / Bilkent University
- Esfandiar Mohammadi, University of Luebeck
- Fabian Prasser, Charité - Universitätsmedizin Berlin / Berlin Institute of Health
- Florian Kerschbaum, University of Waterloo
- Florian Schaub, University of Michigan
- Gergely Acs, Budapest University of Technology and Economics
- Giovanni Cherubin, EPFL
- Ian Miers, Cornell Tech; University of Maryland
- Igor Bilogrevic, Google
- Jamie Hayes, UCL
- Jonathan Mayer, Princeton University
- Joris Van Hoboken, University of Amsterdam & Vrije Universiteit Brussels
- Julien Freudiger, Apple
- Kartik Nayak, Duke University
- Kévin Huguenin, Université de Lausanne
- Lujo Bauer, Carnegie Mellon University
- Marc Juarez, University of Southern California
- Mario Alvim, Universidade Federal de Minas Gerais
- Mathias Humbert, armasuisse W+T
- Matthew Wright, RIT
- Melek Önen, EURECOM
- Melissa Chase, Microsoft Research

<sup>3</sup> <https://petsymposium.org/artifacts.php>

- Micah Sherr, Georgetown University
- Michael Reiter, UNC Chapel Hill
- Michelle Mazurek, University of Maryland
- Minhui Xue, The University of Adelaide
- Narseo Vallina, IMDEA Networks Institute
- Nataliia Bielova, INRIA
- Nick Hopper, University of Minnesota
- Nick Mathewson, The Tor Project
- Nina Taft, Google
- Nitesh Saxena, University of Alabama at Birmingham
- Panagiotis (Panos) Papadimitratos, KTH
- Paolo Gasti, New York Institute of Technology
- Patrick Loiseau, Inria
- Paul Pearce, Georgia Tech; Facebook; International Computer Science Institute
- Paul Syverson, U.S. Naval Research Laboratory
- Pedro Moreno-Sanchez, TU Wien
- Peter Kairouz, Google AI
- Philipp Jovanovic, UCL
- Rachel Greenstadt, New York University
- Rebekah Overdorf, EPFL
- Reza Shokri, National University of Singapore
- Rishab Nithyanand, University of Iowa
- Rob Jansen, U.S. Naval Research Laboratory
- Roya Ensafi, University of Michigan
- Ruba Abu-Salma, University College London (UCL) / INRIA
- Scott Coull, FireEye
- Sebastian Angel, University of Pennsylvania
- Sebastian Meiser, University College London
- Sébastien Gambs, Université du Québec à Montréal (UQAM)
- Shruti Tople, Microsoft Research
- Simson Garfinkel, U.S. Census Bureau
- Sonia Ben Mokhtar, CNRS
- Stefanie Roos, TU Delft
- Stefan Katzenbeisser, University of Passau
- Takao Murakami, National Institute of Advanced Industrial Science and Technology (AIST)
- Tao Wang, HKUST
- Theresa Stadler, EPFL
- Thomas Zacharias, University of Edinburgh
- Travis Mayberry, U.S. Naval Academy
- Wouter Lueks, EPFL
- Xi He, University of Waterloo
- Yang Zhang, CISPA Helmholtz Center for Information Security
- Yossi Gilad, MIT
- Yupeng Zhang, Texas A&M University

**Publications Chairs:**

- Vasilios Mavroudis
- Tobias Pulls

**Artifact Chairs:**

- Cecylia Bocovich
- Jack Grigg

**Video Chair:**

- Ryan Henry

**Publicity Chairs:**

- Rebekah Overdorf
- Kat Hanna

**Web Chairs:**

- Ian Goldberg
- Kat Hanna

**Sponsorship Chairs:**

- Rachel Greenstadt
- Steven Murdoch

**Stipend Chairs:**

- Roger Dingledine
- Emiliano De Cristofaro
- Damon McCoy
- Andrei Serjantov

**PET Award Chairs**

- Simone Fischer-Hübner
- Ross Anderson

**We thank the following shepherds:**

- Esfandiar Mohammadi
- Ryan Wails
- Rob Jansen
- Katharina Kohls
- Erman Ayday
- Markulf Kohlweiss
- Oleksii Starov
- Alptekin Küpçü
- Aziz Mohaisen

- Chaya Ganesh
- Micah Sherr
- Melek Önen
- Douglas Leith
- Cristina Onete
- Christo Wilson

**We thank the following external reviewers:**

- Mohammed Abuhamad
- Ulrich Matchi Aïvodji
- Kovila P.L. Coopamootoo
- Christoph Egger
- David Froelicher
- Peng Gao
- Alexandra Giannopoulou
- Katharina Kohls
- Chelsea Komlo
- Bogdan Kulynych
- Elena Lucherini
- Asad Mahmood
- Akshaya Mani
- Celestin Matte
- Luca Melis
- Milad Nasr
- Balazs Pejo
- Jan Pennekamp
- Florentin Rochet
- Ahmed Salem
- Sajin Sasy
- Phillipp Schoppmann
- Christopher Schwartz
- Shawn Shan
- Oleksii Starov
- Om Thakkar
- Santiago Torres
- Daniel Votipka
- Ryan Wails
- Lun Wang
- Huichuan Xia

Sincerely,

Kostas Chatzikokolakis and Aaron Johnson

Program Co-Chairs of PETS 2020 and Co-Editors-in-Chief of PoPETs Volume 2020.
