It is our great pleasure to introduce Issue 3 of Volume 2023 of the Proceedings on Privacy Enhancing Technologies (PoPETs). PoPETs is a journal that publishes articles accepted to the annual Privacy Enhancing Technologies Symposium (PETS). To contribute to the free availability of scientific publications, PoPETs is published under the open-access Creative Commons Attribution-NonCommercial-NoDerivs license.

PoPETs/PETS uses a hybrid conference-journal model, one that has since been adopted by many other conferences in the field. In this model, articles are published throughout the year at regular intervals, and the papers for the year are then presented at an annual conference. Reviewers can request revisions of submitted articles, which may then be revised and resubmitted in the same year. PoPETs publishes four issues per year. By enabling resubmission across these issues, PoPETs provides a high-quality peer-review process that enables authors and reviewers to work together to produce and recognize significant scholarly contributions.

The PoPETs double-blind peer-review process is similar to other top-tier computer-security publications. The process includes initial review by the Editors-in-Chief for rules compliance and in-scope content, written reviews by multiple independent reviewers, author rebuttal, discussion among reviewers, and consensus decisions with disagreements resolved by the Editors-in-Chief. The output of the review process is a set of reviews, a meta-review summarizing the reviewers’ opinions after discussion, and one of the following decisions: Accept, Accept with Minor Revisions, Major Revisions, Reject and Resubmit, and Reject.

Reviewing by the Editorial Board is performed in two rounds. In the first round, the Editors-in-Chief assign two reviewers from the Regular Editorial Board and a meta-reviewer from the Senior Editorial Board to all papers, and at the end of the round early decisions are made to reject certain papers that have two reject scores (Reject or Reject and Resubmit) from the reviewers. The remaining papers receive additional reviews in the second round for a total of four reviews (in a few cases, submissions received fewer or more reviews). The meta-reviewer guides and summarizes the discussion into a meta-review and a decision recommendation to the Editors-in-Chief after the first or second round of reviewing.

Many articles had an external review drawn from a pool of junior experts nominated by the community1. Further external experts were invited to review certain articles. All reviews were sent to the authors of papers that proceeded to the second round of review, and those authors were invited to provide a written rebuttal to the reviews. After the rebuttal period there was a discussion among the reviewers, the meta-reviewer, other members of the Editorial Board, and the Editors-in-Chief to reach a consensus decision for each paper. The meta-reviewer then wrote a meta-review that summarized the discussion and the justification for the decision.

Articles submitted to this issue were reviewed by 143 members of the Regular Editorial Board, 21 members of the Senior Editorial Board and 48 external reviewers. The submitted articles, reviews, and discussion were available to all members of the Editorial Board who did not have a conflict of interest with the authors of the article. To identify conflicts of interest, the membership of the Editorial Board was published before submissions were opened, and authors were asked to indicate members with whom any of the authors had a conflict. In addition, Editorial Board members were asked to list the authors and institutions with which they have conflicts of interest. Finally, the Editors-in-Chief also checked for missed conflicts. Editorial Board members were welcome to submit articles, while the Editors-in-Chief were precluded from doing so.

There were 137 submissions to this issue of PoPETs. Twenty-two of the 137 submissions had been invited during a previous issue to resubmit after major revision, and these were reassigned to the Editorial Board members that had reviewed the previous version, in most cases including the meta-reviewer (drawn from the Senior Editorial Board). Additionally, 12 articles that had been rejected from a previous issue were resubmitted to the journal, and they were reassigned to some of the same reviewers. For all these resubmissions, the authors provided a summary of changes made to the prior version that explained how review concerns had been addressed.

Of the 137 submissions, 13 papers were accepted, and another 14 were conditionally accepted subject to minor revisions. For the latter, a reviewer was assigned as a shepherd to ensure that the important points from the meta-review were addressed. The identity of the shepherd was kept secret from the authors, and communication between the authors and the shepherd was done (anonymously) through our article submission system. Twenty seven articles were ultimately accepted and form the articles published in this issue. These articles will be presented at PETS 2023.

The authors of 75 other articles were invited to resubmit to a future issue of PoPETs. For 20 of them, specific major revisions were requested, to be reviewed by the same reviewers when submitted to one of the following two PoPETs submission deadlines. The remaining 55 articles received a decision of Reject or Resubmit, as reviewers identified needed revisions that were unlikely to be successfully addressed in a short time. Eighteen papers received a decision of Reject, either due to serious deficiencies or to being out of scope for PoPETs. Twelve submissions were rejected by the Editors-in-Chief without review by the Editorial Board for being

out of scope, over the page limit, or non-anonymous. Finally, five submissions were withdrawn by the authors during the review process.

For the 2023 volume, we continue an artifact-review procedure to collect, evaluate, and distribute artifacts related to accepted papers (e.g. source code, datasets, machine-generated proofs, formal specifications, and build environments)\(^1\). Authors of accepted papers are encouraged (but not obliged) to submit their artifacts for review by an artifact-review committee. The committee performs some checks on artifact quality (e.g. documentation, licensing, and compilation); once approved, artifacts accompany the corresponding papers on the PETS website.

We thank the following people for making the third issue of PoPETs Volume 2023 possible:

**General Chairs for PETS 2023:**
- Kévin Huguenin, University of Lausanne
- Carmela Troncoso, EPFL

**Senior Program Committee / Editorial Board:**
- Adam Aviv, George Washington University
- Lujo Bauer, Carnegie Mellon University
- Kevin Butler, University of Florida
- Sherman S. M. Chow, Chinese University of Hong Kong
- Nicolas Christin, Carnegie Mellon University
- Chris Clifton, Purdue University
- Serge Egelman, University of California, Berkeley / ICSI / AppCensus, Inc.
- Christina Garman, Purdue University
- Carrie Gates, Bank of America
- Ian Goldberg, University of Waterloo
- Nick Hopper, University of Minnesota
- Aaron Johnson, U.S. Naval Research Laboratory
- Stefan Katzenbeisser, University of Passau, Germany
- Damon McCoy, New York University
- Bryan Parno, Carnegie Mellon University
- Florian Schaub, University of Michigan
- Paul Syverson, U.S. Naval Research Laboratory
- Nina Taft, Google
- Blase Ur, University of Chicago
- Christo Wilson, Northeastern University
- Matthew Wright, Rochester Institute of Technology

**General Program Committee / Editorial Board:**
- Ruba Abu-Salma, King’s College London
- Gunes Acar, Radboud University
- Omer Akgul, University of Maryland
- Mário Alvim, Universidade Federal de Minas Gerais
- Abdelrahaman Aly, Cryptography Research Centre, Technology Innovation Institute (TII)
- Frederik Armknecht, Universität Mannheim
- Hassan Asghar, Macquarie University
- Saikrishna Badrinarayanan, Snap
- Diogo Barradas, University of Waterloo
- Zinaida Benenson, University of Erlangen-Nuremberg
- Alastair Beresford, University of Cambridge
- Pascal Berrang, University of Birmingham
- Gergely Biczók, Budapest University of Technology and Economics
- Igor Bilogrevic, Google
- Eleanor Birrell, Pomona College
- Erik-Oliver Blass, Airbus
- Jonas Böhler, SAP SE
- Varun Chandrasekaran, Microsoft Research, University of Illinois Urbana-Champaign
- Melissa Chase, Microsoft Research
- Rahul Chatterjee, University of Wisconsin-Madison
- Sze Yiu Chau, Chinese University of Hong Kong
- Omar Chowdhury, Stony Brook University
- Shaanan Cohney, University of Melbourne
- Jean-François Couchot, FEMTO-ST Institute, Université de Franche-Comté
- Scott Coull, Google
- Jed Crandall, Arizona State University
- Robert Cunningham, University of Pittsburgh
- Anupam Das, North Carolina State University
- Martin Degeling, Stiftung Neue Verantwortung
- Soteris Demetriou, Imperial College London
- Damien Desfontaines, Tumult Labs
- Roger Dingledine, The Tor Project
- Nir Drucker, IBM Research - Israel
- Markus Dürmuth, Leibniz University Hannover
- Christoph Egger, IRIF, Université Paris Cité
- Tariq Elahi, University of Edinburgh
- Pardis Emami-Naeini, Duke University
- Zeki Erkin, Delft University of Technology
- Saba Eskandarian, UNC Chapel Hill
- Álvaro Feal, Northeastern University
- Matt Fredriksson, Carnegie Mellon University
- Kevin Gallagher, Instituto Superior Técnico, Universidade de Lisboa
- Sébastien Gambis, Université du Québec à Montréal (UQAM)
- Paolo Gasti, New York Institute of Technology
- Gennie Gebhart, Electronic Frontier Foundation
- Badih Ghazi, Google Research
- Thomas Gross, Newcastle University, UK
- Cheng Guo, Clemson University / Google
- Emre Gürsoy, Koç University, Turkey
- Andreas Haeberlen, University of Pennsylvania
- Florian Hahn, University of Twente
- Rakibul Hasan, Arizona State University
- Weiija He, Dartmouth College
- Urs Hengartner, University of Waterloo
- Dominik Herrmann, University of Bamberg, Germany
- Jens Hiller, Google
- Thang Hoang, Virginia Tech
- Yuan Hong, University of Connecticut
- Amir Homemard, UMass Amherst
- Roberto Hoyle, Oberlin College
- Murtuza Jadiwalla, The University of Texas at San Antonio
